

Contents

Cover	vii
1. Background	1
2. Overview of Laboratory Responsibilities Tentative Schedule	6
3. Objectives for Week 1	7
4. Concepts for Choosing and Expressing Mutants	8
5. Objectives for Week 2	11
6. Concepts for Protein Expression	12
7. Methods for Protein Expression	15
8. Concepts for SDS-PAGE	17
9. Methods for SDS-PAGE	19
10. Objectives for Week 3	22
11. Concepts for Protein Purification and Desalting	23
12. Methods for Protein Purification and Desalting	25
13. Microfluidizer Lysis Method	26
14. Objectives for Week 4	28
15. Methods for Protein Standard Curves and SDS-PAGE	29
16. Objectives for Weeks 5-9	30
17. Concepts for Enzyme Assays	31
18. Methods for Enzyme Assays	32
Appendix	35
Appendix 1: Micropipette Calibration	36
Appendix 2: Genetic Sequences	37
Appendix 3: Structures of Available Non-canonical Amino Acids	40
Appendix 4: Non-Inducing and Autoinduction Media	41
Appendix 5: Master Supply List	42
Appendix 6: List of Available Sites, Non-canonical Amino Acids, and Plasmids	45
Creative Commons License	48
Recommended Citations	49
Versioning	51
